Projects

Design and Implementation of an Interactive Navigation Screen for CIT World Map

Collaborated with a team to develop an interactive system that presents the local and international partner institutions of the College of Industrial Technology (CIT). The project uses a large TV display, Raspberry Pi 5, and a database to help users explore partner locations and access partnership information through an interactive interface.

Computer Hardware Troubleshooting Guide
Created a simple guide for identifying and solving common computer hardware problems, such as slow performance, startup issues, and peripheral connection errors. The project focuses on basic troubleshooting procedures and proper computer maintenance.

Personal Portfolio Website
Created a simple personal website using HTML and CSS to showcase personal information, skills, and sample projects. The website features a clean layout and organized sections for easy navigation
